✓ Next steps

[Go to resource](#)

Go to First VNET

1. Open Azure Portal
2. Go to Virtual Networks
3. Select VNet-01
4. Click Peering
5. Click Add
6. Give peering link name as vnet1-to-vnet2
7. Allow virtual network access and leave remaining three options.
8. Click add we will see the option called connected.

Add peering ...

Virtual machine

Best for lower-traffic workloads, testing, or to control or highly customize apps, OS, or file system. If your workload or traffic starts to grow, a VM can later be attached to a Virtual Machine Scale Set (VMSS).

Virtual machine scale set (VMSS)

Built-in scaling, performance optimization, load balancing, and batch management for 1 to 1,000 VMs (no added cost). Include multiple VM sizes, zones, regions, and domains, along with discounted Spot VMs.

Presets

Create a pre-configured VM designed to optimize memory, capacity, or for general use. Deploy as-is, or customize as needed.

Hybrid, preconfigured, and high volume solutions

Explore pre-configured Starter kits for Linux and Windows, Azure Arc hybrid infrastructure solutions, and more.
