

VNET PEERING

- VNET peering is a feature in Azure that allows to connect two or more virtual networks to connect within the same region or different regions.

VM-01

The screenshot displays the Azure portal interface for a virtual machine named VM-01. The left-hand navigation pane includes sections for Overview, Activity log, Access control (IAM), Tags, Diagnose and solve problems, Resource visualizer, Connect, Networking, Network settings, Load balancing, Application security groups, Network manager, Settings, Disks, Extensions + applications, and Operating system. The main content area is titled 'Overview' and features a 'Help me copy this VM in any region' button. Below this, there are action buttons: Connect, Start, Restart, Stop, Hibernate, Capture, Delete, Refresh, Open in mobile, Feedback, and CLI / PS. The 'Essentials' section provides key information: Resource group (Sudheer-RG), Status (Running), Location (West US 3), Subscription (Azure subscription_1), and Subscription ID (a3107e0d-376f-4650-b383-aa7b2b3c0c9a). It also lists the Operating system (Linux (ubuntu 24.04)), Size (Standard D2s v3 (2 vcpus, 8 GiB memory)), Primary NIC public IP (20.125.120.64), Virtual network/subnet (vnet-westus3/SUBNET-01), DNS name (Not configured), Health state (-), and Time created (2/2/2026, 8:11 AM UTC). The 'Properties' section shows the Computer name (VM-01) and Operating system (Linux (ubuntu 24.04)). The 'Networking' section indicates the Public IP address (20.125.120.64) and the Network interface (vm-01790).

VM-02

The screenshot displays the Azure portal interface for a virtual machine named VM-02. The left-hand navigation pane is identical to the one in the VM-01 screenshot. The main content area is titled 'Overview' and features a 'Help me copy this VM in any region' button. Below this, there are action buttons: Connect, Start, Restart, Stop, Hibernate, Capture, Delete, Refresh, Open in mobile, Feedback, and CLI / PS. The 'Essentials' section provides key information: Resource group (Sudheer-RG), Status (Running), Location (East US 2), Subscription (Azure subscription_1), and Subscription ID (a3107e0d-376f-4650-b383-aa7b2b3c0c9a). It also lists the Operating system (Linux (ubuntu 24.04)), Size (Standard D2s v3 (2 vcpus, 8 GiB memory)), Primary NIC public IP (20.10.146.193), Virtual network/subnet (vnet-eastus2/SUBNET-02), DNS name (Not configured), Health state (-), and Time created (2/2/2026, 8:18 AM UTC). The 'Properties' section shows the Computer name (VM-02) and Operating system (Linux (ubuntu 24.04)). The 'Networking' section indicates the Public IP address (20.10.146.193) and the Network interface (vm-02558).
